KB Medical Group

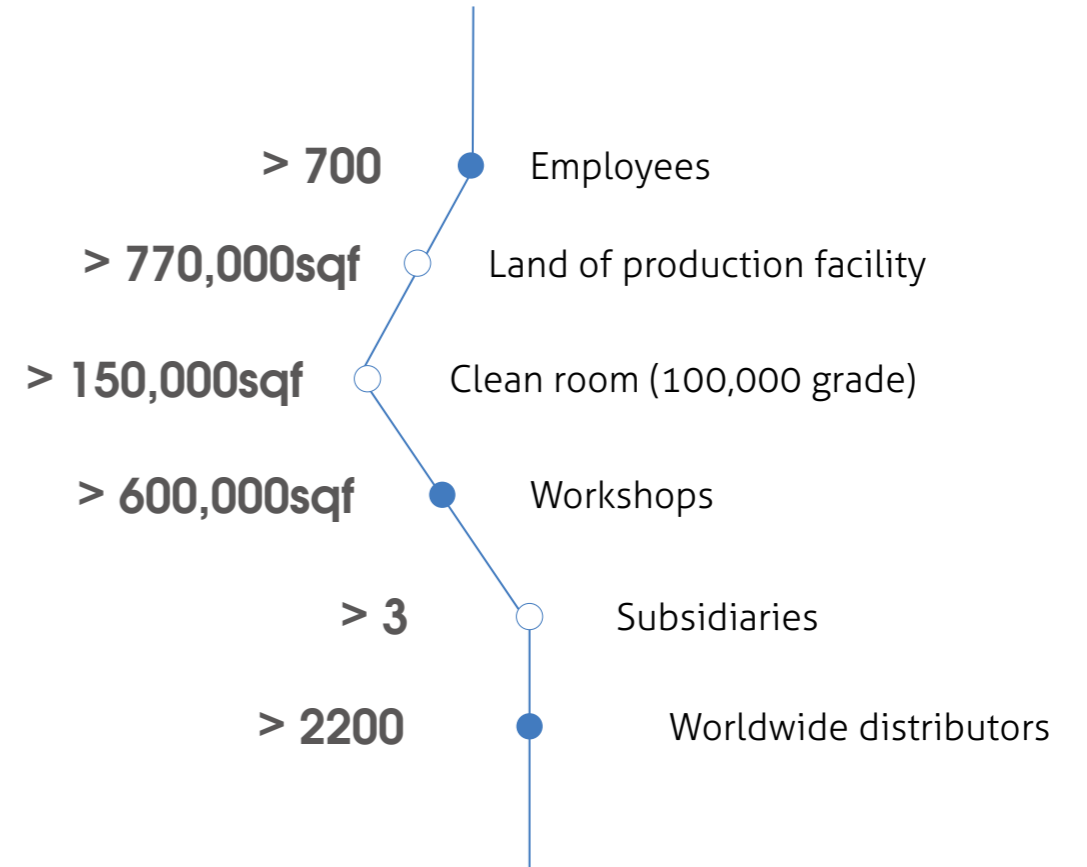

About us

KB Medical Group, located in Irvine California, your leading global partner in the fields of Safety Parenteral Nutrition Support and Enteral Nutrition Solution, Preamalytical Specimen Collection System as well as in the world of research in Safety Medical Device, we use almost 40 years of experience in the healthcare sectors, and our passion for innovation, with more than 700 employees and 3 subsidiaries, with state-of-the-art manufacturing technology and supply capabilities, we develop high-performance solutions for consistent, reproducible results that you can always rely on, we work hand in hand with you to develop tailored solutions to suit your requirements and grow with you. We support you so we can make big things happen together.

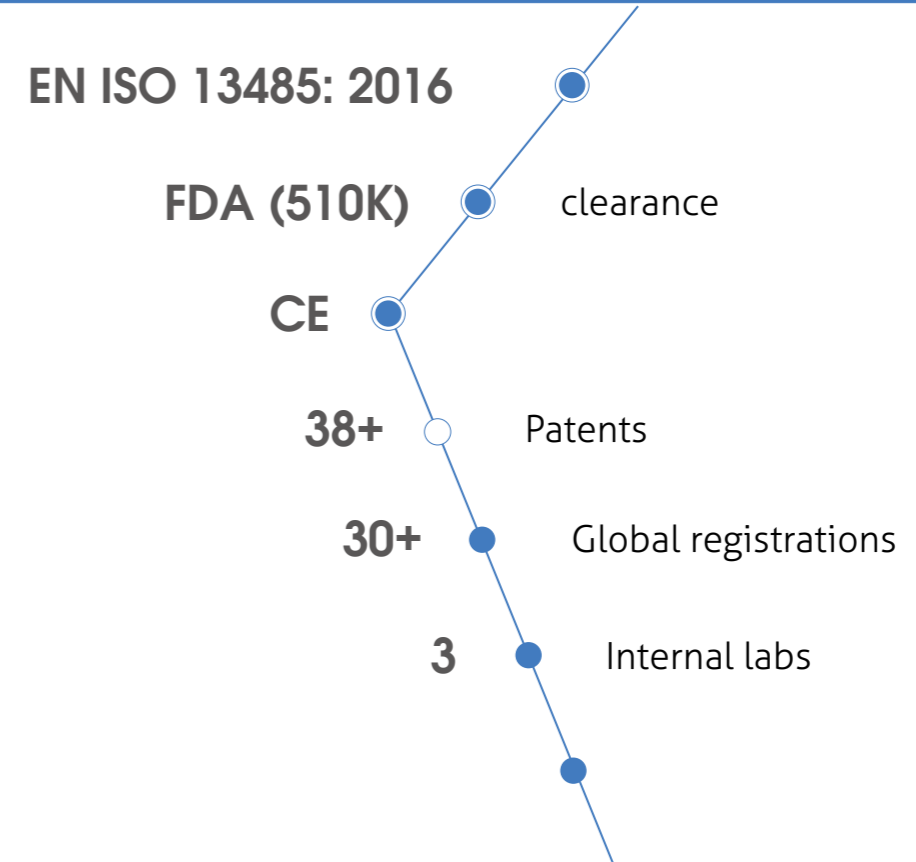

We lead the way in providing:

- Private label product
- Specialty product configurations
- Contract manufacturing
- More....
- OEM supply
- Kitting operations
- Contingency support as secondary supplier

Key Numbers of Our KB Medical Group

Quality, Certificate, and Innovation

Key Numbers of Our Production Facility

- 52+ sets Injection molding machines
- 17+ sets Auto printing lines for syringes
- 15+ sets Blister packing machines
- 15+ sets Auto loading packing machine for syringe (1/3/5/10/20/60/100ml)
- 5+ sets Auto-assembling machine for infusion set
- 3+ sets Auto-assembling machine for Butterfly needle
- 3+ sets Auto-assembling machine for hypodermic needle
- 3+ sets Auto-assembling machine for safety hypodermic needle

Safety Blood Collection Needle

KBMED Safety blood collection needle is simple and easy to use. The safety mechanism can be activated immediately after the blood draw, helping to protect you against needlestick injury. It is also offered with a pre-attached holder for added convenience and to help meet OSHA single-use holder standards.

Feature :

- The Safety Shield protects against needle injuries
- Large wing size permits improved positioning during use
- Blood flashback is seen clearly through translucent shield

Safety Needle Holder

KBMED Safety Needle Holder is applied in the clinical venous sampling which is achieved by blood collection needles to secure the operators

SNH01

SNH02

Needle Holder

NH01

· KBMED single-use holders are compatible with all Vacutainer tubes and blood collection needles

NH02

· The KBMED Blood Transfer holder is used for needleless specimen transfer from a syringe to an evacuated tube or blood culture bottle.

NH03

· The KBMED Luer Lock Access holder is compatible with female luer connections or IV ports designed for luer access.

Blood Collection Tube

We provide a full offering of blood collection tubes in both glass and plastic.

Enteral Nutrition

Enteral Syringe

- FDA cleared for direct oral administration and enteral delivery
- The ENFit syringe tip is compliant with ISO 80369-3 standards
- ENFit syringes are often used in pharmacies, NICU/ PICU, adult ICU, alternate care, home care, and physician offices.

ENFit Single Use Syringe

Product Feature :

- ENFit female.
- DEHP Free
- Latex Free
- Low dose
- Amber color is available

ENFit Home Use O-Ring Syringe

- Up to 84 uses
- O-Ring Plunger
- Low resistance
- Amber color is available

The Enfit Connector

- The ENFit connector is compliant with the ISO80369-3.
- Supply you transition adaptor from Legacy connector to Enfit. (ENC3)
- ENFit syringe cap used as a protective cap to temporarily secure any remaining nutrition between feedings. (ENC6)
- Supply you transition adaptor from Enfit to Legacy connector. (ENC10)

ENFit Feeding Set

Feature:

- ENFit feeding sets are compliant with the ISO 80369-3 to help reduce the risk of misconnections.
- Latex-free and DEHP-free.
- EVA material available.
- G-Gravity use, P-pump use, ENF01-05 available G type and P type.

ENFit Stepped

We're on the path to safer connections

The ENFit connector reduces the risk of tube feeding misconnections, helping enhance patient safety. It has a unique enteral-specific design.

- Has a locking feature that secures the safety connection with administration sets and syringes that have ENFit connectors.
- Aligns with global, industry-wide standards specified by ISO and recommended by the FDA.
- Supply you transition adaptor from Enfit to Legacy connector

ENC10

Oral Dispenser

Feature:

- Special tip design for wrong route administration prevention.
- O-Ring plunger design is the preferred option for smooth and accurate delivery.
- Amber barrel design to protect light-sensitive drug.

Syringe And Needle

Disposable Syringe With Needle

Injection or harvesting of biological material, depending on choice of needle.

Feature :

- Luer slip or luer lock nozzle, central or eccentric nozzle.
- High transparency barrel.
- Smooth consistent plunger action.
- Clear, legible and easy to read graduated scale.
- Minimal dead space.
- Triple contact rubber gasket and plunger-block to prevent accidental leakage during aspiration.
- Well rounded finger grips for safe handling.
- 3 parts and 2 parts are available.
- Sterilized with Ethylene Oxide.
- Gamma ray resistant material are available.
- Latex free pistons are available.

2 parts syringe

3 parts syringe

Disposable Syringe With Safety Needle

Feature :

- Compatible with all safety hypodermic needles.
- Convenient to use, one hand activation, minimal training required.
- Economic, reduce the cost of safety injection.
- Triple safety mechanism to guarantee 100% safety.
- Visual confirmation of safety activation.
- Both luer slip and luer lock nozzle are available.

Before use

After use

Safety Syringe

It is used in extraction of clinical liquid medicine and for injection, help eliminate accidental needle stick injury.

Feature :

- Available with or without needles. Compatible with all standard hypodermic needles.
- Convenient to use, safety mechanism will be activated when the intended dose has been delivered.
- Pull back the plunger after injection, the locking ring secures the needle in the barrel of the syringe protecting from needle stick injury.
- Special design can prevent the needle back into the barrel occasionally.
- Guarantee the complete injection without dead space.
- Exchangeable needles allow clinician to change needle after aspiration of medication.
- Visual confirmation of safety activation.
- Various range of syringes to meet the clinical requirements.

After use

Using step :

- Take off the needle protector.
- Aspiration the medication .
- The safety medication is automatically activated after injection.
- Pull back the plunger to the locking ring.
- Break the plunger.

Safety Needle

It is compatible with all syringes in clinical injection of liquid medicine, easy to use, help eliminate accidental needle stick injury.

Feature :

- It is compatible with all standard syringes with luer lock or luer slip tip.
- Optimum visualization of injection site.
- After the injection, only one hand activation, the needle was covered completely which can immediately achieve the purpose of protection.
- Special safety lock on needle hub, triple safety mechanism to guarantee 100% safe protection.
- Effective function and simple design can reduce the cost of safety injection.
- Easy and quick identification of the needle gauge by ISO colorful coded.
- A wide range of sizes are available.

Disposable Hypodermic Needle

Intradermal, subcutaneous, intramuscular and intra-articular injection, harvesting of biological material depending on chosen gauge.

Feature :

- High quality 304 stainless steel.
- Triple sharpened tip with anti-coring treatment maximize patient comfort.
- Both short bevel and long bevel are optional.
- Silicon coated to ease skin penetration and minimise pain.
- Large ID, high flow, both thin wall and regular wall are available.
- Semi-transparent needle-hub.
- International color coded hub by size for clear recognize.
- Customer special needle size as per required.

Auto-Disable Syringe For Fixed-Dose Immunization

It is mostly used for WHO or UN aid project, the plunger of syringe was locked to prevent the reuse, help eliminate touch contamination.

Feature :

- In all cases, once the auto-disable feature has been activated, It was not possible to re-use the syringe.
- It was impossible to override the auto-disable feature when tested in accordance with the test method of ISO7886-3 Annex C.
- If an integrated needle is used, it shall become an integral part of the syringe and can not be detached.
- The auto-disable feature is automatically and remains effective from the point when 50% of the intended fixed dose has been delivered.
- Invention patented.

Pre-Filled Flush Syringe

0.9% Sodium Chloride Injection, USP

Feature :

- Provides all convenient size syringes & volumes
- DEHP-Free, PVC-Free, Latex Free
- Sterile, non-pyrogenic and non-toxic
- Offers standard dust cover and sterile field configurations
- Virtually eliminates rebound
- Eliminates needles and vials
- Eliminates potentials of cross-contamination
- Complies with all PICC and INS standards
- Compatible with all needleless systems

Specification :

Standard Dust Cover Flush Syringes
(Sterile Fluid Pathway)

Needle sizes according to customer's requests

Safety Insulin Syringe

Feature:

- Safety insulin syringes with integrated needle
- The innovative safety insulin syringe offers comfort and easy insulin therapy injection.
- Help eliminate accidental needle stick injury.

Type 1

- Pull back the plunger after injection, the locking ring secures the needle in the barrel of the syringe protecting from needle stick injury.

Type 2

- Pull the safety cartridge to withdraw the needle into cartridge after injection.
- Easy to lock by rotating the safety cartridge.

Code	Size	Needle size

Insulin Pen Needle

Feature:

- Extremely fine three-facet grinding minimizes tissue trauma
- Special silicone finish for smooth gliding and virtually pain-free penetration of skin and tissue
- Extra-thin-wall technology allows for a larger inner diameter and an optimized Insulin flow; less force is required and injection time is reduced
- Compatible with all major pen devices available on the market

Safety Insulin Pen Needle

Feature:

- Automatically achieve the function of protecting needle tip after use.
- Easy self-disable set
- Easy to see the droplets
- Compatible with all pen injectors

Product Features

Safety design and easy for using
The strength design in needle set make it more convenient and safe to use

High compatibility and cover almost all branches
The product has high compatibility. The standard design of internal threaded ensure it can stably match all branches insulin pen.

Best penetration make injection more comfortable
Insulin pen needle has a series of advanced and mature needle tip technique and silication technique. The sharp needle tip make puncture more easily and let patients feel more comfortable during injection.

High Matching Degree

► The screw thread design of insulin pen needle meets the standard regulated by ISO11608-2 which is compatible with other standard ones domestically produced or imported.

Safety Lancet

It is used in blood collection sampling and help eliminate accidental needlestick injuries.

Feature :

- Needle is fully shielded before and after use
- Cannot be reused
- Ultra sharp tri-bevel needle, high speed penetration
- Multiple depth selection with color coding

Hazardous Drug Safety

Drug Preparation

We offer various drug preparation needles for safety drug admixture, minimizes the risk of needle stick injury while drawing up medication, medication re-constitution and accessing IV bags.

Needle Free System

Needle-free system offer a safe way to access IV lines without the use of a needle, which greatly reduces the risk of accidental needle stick injuries.

Safespike

Safesite

SafespikeF

SafesiteP

SafesiteY

Feature:

- Needle-free system that utilizes split septum technology similar to that of a conventional needle system.
- Provides a swabbable injection site that is a closed system, accessed by inserting a cannula.
- Visually inspect — with a clear outer housing that allows visible flush confirmation, and an open fluid path that has no fluid entrapment areas.
- Connect — minimal connection force is needed, allowing quick, effortless access and easy syringe connection.
- We offer a variety of needleless connector devices to meet the desired need of individual facilities.
- Both Negative pressure and Positive pressure are available.

Blunt Needle With/Without Filter

Blunt needle is a sterile, single use device used for safety drug admixture.

Feature :

- 45° bevel angle optimized for fluid transfer with e.g. stoppered vials, glass and plastic ampoules.
- 45° bevel angle thin walled cannula for faster draw-up (up to 20% higher draw-up speed in comparison to comparable products in the market).
- Made of stainless steel with special smoothing bevel.
- Blunt smoothing bevel design minimizes the risk of needle stick injury while drawing up medication, medication re-constitution and accessing IV bags.
- Red colored hub and protective cap for clear differentiation.
- Blunt needle with filter with a 5micro filter membrane to prevent glass particles being drawn into the syringe when preparing medication from ampoules.

Aspiration Needle With Safety Shield

Feature :

- USA Patent pending, PCT with a priority date already initiated.
- The shield that prevents accidental needle stick injury, 100% to protect the doctors and nurses from the danger.
- Intended for aspiration of medications from all kinds of vials safely.
- Injection of medications into IV rubber ports safely.
- Transfer of biological specimens, blood into vacuum specimen tubes safely.
- Compatible with standard luer slip and luer lock syringes.

FDA 510k approved

Curved Needle

Feature :

- The curved needle will reduce the risk of needle stick injuries.
- To avoid cutting the rubber pieces during the penetration.

Curved needle

Side hole needle

Side Hole Needle

Feature :

- The side hole needle could avoid cutting the rubber pieces during the penetration.

Safety Sharps Stations

Product Use:

The Safety Sharps Stations provides sharps organization, counting and disposal of contaminated sutures, blades and needles with unique blade remover.

Feature:

- Wide choice of formats, including foam blocks, magnetic surfaces, adhesive surfaces and foam strips, to meet customer preference and clinical indication
- Quick, simple and universal blade remover
- Detachable halves allow the same needle counter to be used in two separate areas.
- Unique locking mechanism prevents inadvertent opening whilst enabling re-counts if required
- Deep overlapping edges prevent accidental sharps migration

Ultimate Safety Sharps Stations

Product Use:

The unique, patented Ultimate Safety Sharps Stations provides sharps organization, counting and disposal of contaminated sutures, blades and needles. This extensive range incorporates a number of unique safety features, which significantly reduce the risk of inadvertent sharps injuries.

More advantages:

- USA Patented and the exclusive manufacturer in our facility.
- Surgical blade safety removal device with a protection wall to protect the jumping of blades.
- The ultimate safety lock device guarantees the needle counter can not be open again.
- A needle sheathing safety device to help user's hand free and clear of the needle.
- 2 universal safety holding device enable to hold both disposable syringe and scalpel

Puncture-Proof-Pad

Product Use:

The Puncture-Proof-Pad is a unique rigid plastic, puncture-proof-pad for the simple, safe organization, counting and disposal of contaminated sutures, blades and needles.

Features and benefits include

- Strong rigid construction prevents accidental penetration by contaminated sharps
- Wide adhesive strip ensures secure sharps retention
- Secure locking mechanism prevents inadvertent opening
- Overlapping edges prevent sharps migration
- An optional 'fold flat' edge allows the safe accommodation of hypodermic needles and scalpel handles when required

Puncture-proof-pad

Sharps Pad

Product Use:

The Sharps Pad is a unique cost effective puncture resistant pad for the simple, safe organization, counting and disposal of contaminated sutures, blades and needles.

Features and Benefits include

- Tough puncture resistant plastic offers excellent protection against the risk of accidental sharps penetration
- Wide adhesive strip ensures secure sharps retention
- Overlapping edges prevent sharps migration
- A castellated edge allows the safe accommodation of hypodermic needles

Sharps pad

Scalpel Shield

Product Use:

The Scalpel Shield is a purpose-designed device for the safe, secure storage of up to three scalpels in the sterile field.

Features and Benefits include

- Conveniently stores handles in the 'upright' position ensuring safe and simple placement and retrieval
- Shrouded blade design prevents accidental personal injury and damage to drapes
- Adhesive tab secures and stabilises device in the sterile field

Scalpel shield

Sharps Pad- Economic Type

Product Use:

The Sharps Pad - Economic Type is a simple, low cost cardboard backed foam pad which offers the minimum requirement for the organization, counting and disposal of contaminated sutures, blades and needles.

Features and Benefits include

- Purpose designed
- Convenient
- Low cost

Sharps pad - economic type

Sharp Container

The Sharp Containers are used for disposal of hospital waste and characterized by an elevated level of safety and reliability. The material used for production guarantee the solidity, the hermetic closure, and the high resistance to shock and puncture.

Infusion Therapy

Safety Scalp Vein Set

It is used for injection of vein for medication infusion, the safety mechanism help to eliminate accidental needlestick injuries.

Feature :

- The ergonomic design is ideal for clinician handling and patient comfort.
- Offering an easy grip.
- The design to minimize slips and touch contamination.

Safety scalp vein set

Infusion Set

Delivering solutions in IV therapy for improved patient care.

Features :

- Sharp spike is easy to puncture.
- The ISO standard spike can fit with any infusion bottles and bags.
- Soft and transparent chamber is easy to press and adjust solution.
- Antibacterial air-inlet.

IVS01

- Big amber-colored drip chamber with air vent, ABS Adelberg flow regulator, amber-colored tube 1.5m, luer lock with needle.

IVS05

- Big chamber with air vent, filter, needless Y site, Adelberg flow regulator, 1.8m tube, luer lock with cap.

IVS02

- Small drip chamber with air vent, Y site, 1.5m tube, luer slip without needle.

IVS03

- Winged spike, medium drip chamber with air vent, 10drops, filter, ABS Adelberg flow regulator, Y injection port, 1.8m tube, luer lock without needle.

IVS04

- Medium drip chamber without air vent, 60 drops, filter, Y injection port, 1.8m tube, luer slip without needle.

Infusion Set

We offer a wide variety of IV accessories to meet the needs of current practice:

Spike with drip chambers

- With/without air vent.
- 10drops, 20drops, 60 drops/ml.
- With filter or without filter.
- 50mm/54mm/62mm drip chamber

Flow regulators

- Small flow regulator, Medium flow regulator, ABS Adelberg flow regulator, Protective flow regulator, Accurate flow regulator rate of 5mL/hr to a maximum of 300mL/hr.

Injection ports

- Latex/Latex free straight tube, Injection bulb

Transfer sets

Y injection ports

- Needless Y injection port, Latex/Latex free Y injection port

Connectors

- Luer slip, Luer lock. Rotating luer lock connector Connector cap , Vented cap

- PVC tube length from 1.3m to 2.2m or any required length.
- PVC DEHP FREE, TOTM, Non-PVC tube material available
- Customized mold construction for any kind of components.

IV Burette

Delivering solutions in IV therapy for improved patient care.

Features :

- Soft and transparent chamber for easy to read graduated scale.
- Floating valve for easy fluid level indication and auto shut-off to resist the air bulb to the vein.
- Integral 15 micron air-guard filter to prevent air introduction.
- 60drops/ml.
- Gravity use.

Needle-free injection site

Air vented spike

Description	code
Soft chamber 100ml, with air vent, latex tube, tube 1.5m, luer lock with needle.	IVB 100-1
Hard chamber 100ml, with air vent, latex bulb, luer slip with needle	IVBH 100
Soft chamber 110ml, with air vent, with latex shut-off valve, Y injection port, tube 1.8m, luer lock with needle	IVB 110-1
Soft chamber 150ml, with air vent, with latex shut-off valve, Diameter 5.6mm tube to comply with the infusion spike.	IVB 150-1
Soft chamber 150ml, with air vent, with plastic shut-off valve, needleless Y injection port, tube 2.2m, luer lock without needle.	IVB 150-2

IV Cannula

Delivering solutions in IV therapy for a short term period.

Features :

- Color-coded casing cap allows for easier identification of catheter size.
- Translucent catheter hub and flashback chamber allows for easy detection of blood.
- Flash back at vein insertion.
- Teflon radio-opaque catheter.
- Precision finished pet or PU catheter assures stable flow and eliminates catheter tip kink.
- The sharp needle features a universal bevel geometry that allows a wider choice of insertion angles.
- Can be connected to syringe by removing filter cap to expose luer taper end.
- Use of hydrophobic membrane filter eliminates blood leakage.
- Close and smooth contact between catheter tip and inner needle enables safe and smooth.
- Vein puncture.

Safety IV Cannula

Features :

- Safety design can reduce needle stick Injuries.
- Result in less blood exposure to staff than catheters featuring spring-retraction of the needle.
- Promote first Stick Success.
- The safety design ensures that the safety mechanism is always activated and prevents re-insertion of the stylet.
- No extra steps are required to ensure healthcare worker and patient safety.
- With this easy-to-use safety IV catheter, you can be confident of successful needle and catheter placement every time.
- PVC-Free, DEHP-Free and Latex-Free.
- Close system and open system available.

Three Way Stopcock

Maximize fluid flow control and fluid and drug delivery efficiency.

Features:

- We can offer a full range of stopcocks to assist you in controlling fluid flow through IV delivery systems.
- Single packaged, as various options to meet all of your IV therapy needs.
- All options are liquid resistant with a transparent housing for clear view of the fluid path.

BTS002

· Big chamber without air inlet

BTS003

· Blow chamber

Blood Bag

It is used to collect and preserve whole human blood and blood components in hospital or blood bank.

Features :

- Our blood bag could not only guarantee high quality of the blood components but also to provide maximum safety during blood donation and sample collection.
- The safety needle shield enhances safety against the accidental needle stick injury that can transmit HIV, Hepatitis B and C and other blood borne diseases.
- Closed system & reusable blood sampling with vacuum tube.
- Label material with pre-cutting line and could not be tear integrated.

BB03/Triple

BB01/Single
Single blood bag is used for collection of whole human blood. It consists of one bag containing anticoagulant solution CPDA.

BB02/Double
Double bag system consists of one primary bag containing anticoagulant solution CPD/CPDA and one empty satellite bag, for separation of half plasma.

BB03/Triple
Triple bag system consists of one primary bag containing anticoagulant solution CPD/CPDA, one satellite bag containing SAGM preservation solution, and one empty satellite bag. This additive can maintain red blood cell viability, with over 80% of survival rate after 5 weeks of storage.

BB04/Quadruple
Quadruple bag system consists of one primary bag containing anticoagulant solution CPD/CPDA, one satellite bag containing SAGM preservation solution, and two empty satellite bags. The additive SAGM can maintain red blood cell viability, with over 80% of survival rate after 5 weeks of storage.

Cord Blood Bag

It is designed to collect the umbilical cord blood (also known as placental blood) after the birth of the baby, within the shortest time and minimal risk of contamination. The clinical use of the cord blood is allergenic transplantation in patients suffering from severe blood diseases such as leukemia, lymphoma, etc.

Features :

- Sharp spike is easy to puncture.
- Plastic spike/metallic spike available.
- Vented with hydrophobic bacterial filter.
- The ISO standard spike can fit with any blood bags.
- Soft and transparent chamber.
- Extra soft & kink resistant tubes.
- Acute roller clamp.
- With 200micron filtration.
- Latex free.
- Straight and Y type are available.
- DEHP free tube is available.

CBB01

Leukocyte filter

Sampling device & safety needle protector

Optional

- Top and top system.
- Top and bottom system.
- Empty transfer bag.
- PALL leukocyte filtration system.
- Blood sampling with vacuum tube.
- Customization bags.

Spinal Needle

Subdural, lower thorax and lumbar spinal puncture.

Features:

- Full sizes of anesthesia needles.
- Identified as spinal needle bevel quincke tip, pencil point tip and epidural needle.
- 304 stainless steel needle tubes and stylets.
- International colour coding.
- With mounted introducer needle.
- Luer lock hub.

Quincke tip	Introducer	Length	Code
18G×3-1/2"	None	38-220mm	SNQ18
19G×3-1/2"	None	38-220mm	SNQ19
20G×3-1/2"	None	38-220mm	SNQ20
21G×3-1/2"	None	38-220mm	SNQ21
22G×3-1/2"	None	38-220mm	SNQ22
23G×3-1/2"	19G×1-1/2"	38-220mm	SNQ23
24G×3-1/2"	20G×1-1/2"	38-220mm	SNQ24
25G×3-1/2"	20G×1-1/2"	38-220mm	SNQ25
26G×3-1/2"	20G×1-1/2"	38-220mm	SNQ26
27G×3-1/2"	22G×1-1/2"	38-220mm	SNQ27

- Trauma-free QUINCKE short tip to ensure immediate injection point closure and reduced CSF loss.
- Differentiated angle coupling of needle and obturator tip to avoid production and movement of tissue fragments, improving operator sensitivity.

Pencil point	Introducer	Length	Code
22G×3-1/2"	None	90-220mm	SNP22
23G×3-1/2"	19G×1-1/2"	90-220mm	SNP23
24G×3-1/2"	20G×1-1/2"	90-220mm	SNP24
25G×3-1/2"	20G×1-1/2"	90-220mm	SNP25
26G×3-1/2"	20G×1-1/2"	90-220mm	SNP26
27G×3-1/2"	22G×1-1/2"	90-220mm	SNP27

- With no sharp edges separates fibers without slicing.
- The lateral hole shape and its position relative to the tip favour rapid CSF reflux and effective analgesic administration.
- Reduce the risk of saddle block.

Anesthesia Kit

Single-use anesthesia set is clinically used for epidural or spinal anesthesia during puncture and drug injection. This product can only be for single-use, in order to avoid cross-infection. It contains the unique components needed to perform anesthesia operation.

AK01

Components

- Epidural needle, Size: 15G,16G,17G,18G. Length: 80mm, 90mm.
- Spinal needle, Type: Quincke tip & pencil point, Size: 18G,19G,20G,21G,22G,23G,24G,25G,26G,27G. Length: 38mm--150mm.
- Epidural catheter, Size: OD:φ1.0, OD:φ0.8, Length: 850mm.
- Epidural filter: 0.22μm with hydrophobic membrane luer lock.
- LOR syringe: 5ml, 7ml, 10ml.
- Catheter adaptor: TBA, secure the catheter completely.

Optional

- Epidural kit, spinal kit and combined kit available.
- Catheter with /without metal wire available.
- Precision filter 0.2-5μm available.
- Double layer UV filter 0.2-5μm are available.
- Any customization components.

High Pressure Manifold

Maximize fluid flow control and fluid and drug delivery efficiency. Use two and three port normally closed valve manifolds for maximum fluid and drug delivery efficiency in the Operating Room. Confidently maintain drug dosing integrity when administering multiple drugs with back check valves in each port.

Features:

- No leakage under 500psi.
- Smooth rotation, easy use.
- Different color for choice.
- DEHP-free, Latex-free.

Code	Spec.
HPM2	Dual Valve
HPM3	Triple Valve
HPM4	Four Valve

NRFit Syringe

It is used for regional anesthesia, the new patient safety initiative neuraxial products with NRFit connectors according to American Society of Anesthesiologists (ASA) meeting, Oct. 22-26 in Chicago 2016. All healthcare facilities are expected to begin converting to meet the ISO standard requiring NRFit connectors for neuraxial use. Healthcare facilities has already taken legislative action by mandating that convert to these new standardized epidural products by Jan. 1, 2017.

Features:

- NRFit connectors design--ISO80369-6 compliant.
- Neuraxial applicant connector.
- Small bore connectors that are intended to prevent misconnections to improve patient safety.

Code	Size	Type
NRS3	3ml	NRFit connector
NRS5	5ml	NRFit connector
NRS10	10ml	NRFit connector
NRS20	20ml	NRFit connector

Urinary Care

Urine Drainage Bag

Urinary drainage bags are intended to collect urine from sheaths or catheters. It provides solutions to help improve patient safety and infection prevention in urinary care.

Features:

- Anti-reflux drip chamber on the bag helps prevent urine reflux.
- With airvent and non-return valve
- Varies choice of components: universal hanger, bed sheet clamp, dog house, needless samples port.
- High grade PVC.
- Latex free.
- Tyvek pouch for O.R. pack or PE packing.

UDBA20

Apple shape 2000ml
4000ml is available.

UDBD20

Diamond shape 2000ml

Urine Meter

Features :

- Designed for easy bag suspension with a reinforced double hanger and built -in anti-back guide.
- Convenient needleless sample port is accessible with either needleless or blunt cannula, and offers added protection for patient and caregiver.
- Adjustable bed sheet clamp secures tubing.
- Include additional rope hanger.

Code	Spec.
UM01	400ml meter with 2600ml bag, 3 chambers.
UM02	400ml meter with 2000ml bag, 2 chambers.
UM03	500ml meter with 1500ml bag, 4 chambers.
UM04	200ml meter with 2000ml bag, 1 chamber.
UM05	500ml meter with 2000ml bag, 1 chamber.

Remark:200ml-500ml capacity meter is available

Leg Bag

- Rectangle or arc style for customer option.
- It is secured with two comfortable straps in latex free, they have a twist drainage outlet or flip flow valve for easy emptying.
- T-tap outlet or twist outlet for one hand easy emptying.
- With white fabric for comfortable skin touch.
- Tube length 30-90cm for customer option.
