PUSH BUTTON

BLOOD COLLECTION SET

SAFER & EASIER

BEVEL TECHNOLOGY

- Unique bevel design requires lower penetration force*
- More comfortable patient experience

INCREASED FLOW RATE

- Needle Cannula increases flow rate 200% (23G) and 60% (21G)*
- Improve patient comfort: Use 23G instead of 21G without compromising flow rate
- Approved for short-term infusion (<2 hrs)

SAFETY WITH THE PUSH OF A BUTTON

- Single-handed activation retracts the needle instantly from the vein into the needle hub
- Minimizes sharp exposure

*Compared to leading-brand standard cannula
